

## Merric Klein

*Outrageously gorgeous. Applauded in art shows, magazines, and on television. The world's finest bicycle,..... perfect in every detail!*

## Stage & Team Super

*Offered as either custom fitted framesets or bicycles. Like the Merric Klein, boron is used on the Stage and Team Super to enhance the performance and ride. No effort is spared on the show quality finish. See main brochure for more details.*

## Advantage & Criterium

*Custom fitted framesets and bicycles. The essence of the Stage and Team Super at a more modest price. For description, see next page.*

## Performance

*A production version of the superior frameset. Klein technology at an economical price. See back of brochure for more details.*

*.....Advantage and Criterium framesets and bicycles offer excellence of performance and handcrafted beauty unmatched by any other frame builder.*

*The Advantage is patterned after the Stage. The geometry, light weight, comfort and power train rigidity make it the best frameset available for fast touring, time trial and general road racing. The exceptional strength and rigidity built into this frameset for the above purposes also make it ideal for heavy duty touring - in fact it is more capable in this respect than heavy steel touring frames. Available in even sizes from 46 to 70 cm.*

*The Criterium has the Klein racing frame design shown in the main brochure for the Team Super™. The shorter wheelbase and higher bottom bracket are particularly well suited for criterium racing. Available in sizes 51, 54, 57, 59, 61, and 64 cm.*

*Both the Advantage and Criterium are designed for the serious rider the one who wants a custom fitted bike to deliver the speed, ride and handling that only Klein Power Tubing™ can provide. Nothing else even comes close!*
