

# MEDICI BICYCLES

The Pro-Minimo is a road racing 12 speed professional bicycle designed to accommodate 700C or 27 inch wheels and equipped with clincher or tubular tires.

Care was taken to:

- 1.) Build in enough stability to quell shimmy and eliminate toe-clip overlap.
- 2.) Provide responsiveness enough to encourage smooth performance in the criterium turns.
- 3.) Employ a geometric configuration that is conducive both to competitive speed & long distance comfort.

It is available in 3 sizes as a frameset or as a complete bicycle equipped with Campagnolo, Triple T, & MEDICI components.

Colors are the same as those supplied on MEDICI Pro-Strada, Pro-Pista, & Gran Turismo framesets.

Some limited component & braze-on options can be satisfied, such as:

- 1.) Wheel type
- 2.) Crank length (165 mm is standard)
- 3.) Freewheel cog sizes
- 4.) Stem length
- 5.) Toe clip size (Short is standard)
- 6.) Chainring teeth (52/42 is standard)

but standard components are those provided on the MEDICI Pro-Strada. The Campagnolo SUPER RECORD group with steel bottom bracket axle & steel pedal spindles is an integral part of the Pro-Minimo superlative performance. Track Headset minimizes distance between fork crown & head tube. Optional use of track stem will provide a lower handlebar position to compensate for custom saddle height. Brake levers have been permanently adjusted to suit hand size and finger length commonly associated with persons less than 5'2" (157.5cm) tall.

A fully chromed fork & chromed drop-outs are hallmarks of MEDICI craftsmanship.
